"The Duck is the most versatile of all the Disney characters. He can carry off any role with honors — except dumb roles or gentleman parts... He is vain, cocky and boastful, loves to impose on other people and heckle them; but if the tables are turned, he flies into a rage... It is his cockiness that gets him into most of his scrapes, because it is seasoned with foolhardy recklessness... His most likeable trait is determination... Regardless of the odds against him, he comes back again and again into the fray"

— Interstudio memo from a Disney story man, 1939.

THE MARS COLONY OF THE FUTURE

MOST SCIENTISTS BELIEVE THAT COLONIES ON OTHER PLANETS WILL BE A FACT OF THE FUTURE. THE FIRST SUCH COLONY MAY BE ON MARS. THIS STAMP SET DEPICTS ONLY ONE POSSIBLE CONFIGURATION FOR SUCH 'OFF WORLD' FACILITIES. 1) THE PHOBOS SERIES WAS SO SUCCESSFUL THAT THEY CONTINUE WELL INTO THE FUTURE. THEY MAP THE SURFACE AND CHECK FOR THE LOCATIONS OF RAW MATERIALS. 2) FROM MARS THE EARTH IS NOT THIS LARGE, BUT IT STILL THE MOST FRIENDLY FACE IN THE UNIVERSE. 3) IN THE FUTURE, THE WORK HORSE SPACE SHUTTLE WILL CONTINUE TO OPERATE. 4) LIGHT HOUSES WILL BE AS USEFUL IN SPACE AS THEY WERE ON EARTH. THEIR BEACONS HELP GUIDE SHIPS TO AND FROM THE COLONY. 5) AFTER THE INITIAL DANGEROUS EXPLORATION OF MARS IS COMPLETE, SIGHTSEERS WILL SOON FOLLOW. BIG LUXURY SPACE LINERS WILL PLY THE WAVES BETWEEN THE EARTH AND MARS. 6) INSIDE THE LARGE DOMED MARS CITIES. LIFE WILL GO ON MUCH AS IT DOES ON EARTH. SMALL SHUTTLES WILL TAKE PEOPLE AROUND THE COLONY. 7) THE VIKING LANDER WAS ONE OF THE MORE IMPORTANT EARLY MACHINES TO VISIT MARS. IT TESTED THE SOIL FOR MINERALS AND WATER. 8) THE COLONY WILL HAVE TO CREATE ITS OWN WATER AND BREATHABLE AIR. THIS WILL BE DONE BY USING THE RAW MATERIALS IN THE MARTIAN LANDSCAPE. 9) PEOPLE WILL STILL BE ABLE TO GO ON PICNICS AND OTHER FAMILY EXCURSIONS IN THE DOMED CITIES.

Freight locomotive of Russian design initially imported in 1949 from the Soviet Union and later manufactured in China. Believed still to be in production.

1. SHANGHAI - NANKING 4-6-2 PASSENGER TANK ENGINE 1909. A thoroughly modern design built for a newly created line by the North British Locomotive Co. Ltd. of Glasgow.
2. SHANGHAI - NANKING RAILWAY 4-2-2 'IMPERIAL YELLOW' 1910. Built by Kerr, Stuart & Co. of Stoke-on-Trent, Staffordshire. The main line out of Shanghai was level and suited to operation by engines with seven foot 'single' driving wheels hauling high speed light-weight mail and passenger trains.
3. MANCHURIAN RAILWAY 4-6-2 'PACIFIC' 1914. American built for Japanese owned S. Manchurian Railway linking broad gauge Russian owned Chinese Eastern Railway to standard gauge railways of China proper.
4. CHINESE NATIONAL RAILWAYS HANKOW LINE 4-8-4 1934. Imposing and very efficient mixed traffic locomotives built by Vulcan Foundry of Newton-le-Willows, Lancashire for heavy freight and passenger work while burning low grade coal. Twenty four built remaining in service to 1960 and beyond.
5. CHINESE NATIONAL RAILWAYS CLASS SY 2-8-2 1949. Following the Communist revolution in China of 1949 and the resulting rapid expansion of rail networks, a large quantity of Soviet Russian motive power and rolling stock was imported and later built in China continuing to this day.
6. CHINESE NATIONAL RAILWAYS CLASS QJ 2-10-0 1949. Russian designed. Chinese built mixed traffic locomotives still in production and service today.

GENERAL
In the same way as Japan, China kept its doors firmly closed to the outside world until the last years of the nineteenth century and was thus late in adopting modern technology and industry. Thus railways were late in arriving and slow in expanding hindered also by internal strife and war in the first half of the twentieth century. After 1949 expansion was rapid, assisted by the Soviet Union. Vast reserves of low grade coal have aided the survival of steam power.

BIRDS OF THE MALDIVES

The Maldives archipelago is composed of 26 natural atolls and 1192 islands, covering an area of 90,000 square kilometers in the Indian Ocean. (The word 'atoll' is Maldivian in origin). These islands attract the many species of tropical seabirds, some of which are pelagic, whilst others breed locally.

BROWN BEAR
in Romania

Bear hunting has become a profitable business attracting western hunters to both public and privately administered territories. Approximately 250 bears are hunted annually in Romania. The Brown bear conservation and research program in a model area in Romania was established in 2006 in order to preserve this species.
