Badak Jawa or Javan Rhino (Rhinoceros sondaicus) is considered to be one of the world's rarest and most endangered of all animals. Once it ranged over Bengal through Burma, Sumatra and Java but now only two populations remain. Up to 23 rhinos live along the Dong Nhat River in Vietnam and 53 to 60 are left in Ujung Kulon National Park, their last home in Indonesia.

Badak Sumatera or Sumatran Rhino (Rhinoceros sondaicus) is the only hairy and smooth of five existing species of rhinoceros. Today, they are found only in small isolated populations living in rugged terrain in Sumatra. Its population is about 300 to 900 animals.
