"A bit of paper just large enough to bear the stamp, and covered at the back with a glutinous wash" – this was Rowland Hill's proposal that eventually became the world's first adhesive postage stamp. Issued in 1840, the Penny Black made it easy and inexpensive to send mail, revolutionising communications forever.

THE HONEYBEE

- WAGGLE DANCE -
 The waggle dance communicates the direction and distance to flowers yielding nectar and pollen.

- POLLINATION -
 Honeybees transfer pollen between male and female plants, enabling fertilisation and reproduction.

- MAKING HONEY -
 Honeybees transform nectar into honey and store it in wax honeycombs.

- TENDING YOUNG -
 Larvae are fed royal jelly for three days; those fed for longer become new queens.
